

The background of the image is a vibrant, abstract composition of geometric shapes in red, yellow, green, and blue. A large red five-pointed star is positioned on the left side. The letters 'TAU' are rendered in a white, 3D-outlined font, with the 'T' partially overlapping the red star. A thin white vertical line separates the 'TAU' from the university's name.

What President Yayi and I Were Going To Talk About.

TRUE AFRICA
UNIVERSITY

Massachusetts
Institute of
Technology

AGENDA 2063, which President Yayi worked on when he was the Chair of the African Union in 2012 and 2013, is Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future.

It is the continent's strategic framework that aims to deliver on its goal for inclusive and sustainable development and is a concrete manifestation of the pan-African drive for unity, self-determination, freedom, progress and collective prosperity pursued under Pan-Africanism and African Renaissance.

The need to envision a long-term 50-year development trajectory for Africa is important as Africa needs to revise and adapt its development agenda due to ongoing structural transformations:

- increased peace and reduction in the number of conflicts
 - renewed economic growth and social progress
 - the need for people centered development
 - gender equality and youth empowerment
 - changing global contexts such as increased globalization and the ICT revolution
 - the increased unity of Africa which makes it a global power to be reckoned with and capable of rallying support around its own common agenda
 - emerging development and investment opportunities in areas such as agri-business, infrastructure development, health and education as well as the value addition in African commodities.
